SUMMARY

I'm an aspiring entrepreneur passionate about technology and innovation. I have skills in software development, creating programs and apps, and project management, leading teams to achieve goals. My goal is to use these skills to create solutions that solve problems, improve lives, and make a positive impact. I want to build something that succeeds in business and helps others

WORK EXPERIENCE

Intern full-stack developer   June 2024 - July 2024

Conducted research on emerging educational technologies to inform product development. Collaborated with the marketing team to promote services, increasing brand awareness through social media campaigns. Gained hands-on experience in customer addressing inquiries and resolving issues efficiently.

HACKATHON

BITS Hackathon – 7th Place [2024] Mental Health Management System (Hackathon Project) Secured 7th place in the prestigious BITS Hackathon, competing against top talent.

PROJECTS

Language Learning App

Designed and developed a web application to facilitate language learning through interactive exercises. Implemented a feature to track and display user progress over time, allowing learners to see their improvement and stay motivated with achievements, milestones, and personalized feedback.

Employee Management System (Internship Project)

Collaborated on a comprehensive employee management system to streamline HR processes. Features included employee records management, attendance tracking, and performance evaluations.

Disease Prediction (ML project)

Machine learning algorithms, such as Random Forest and Support Vector Machines, can achieve high predictive accuracy in disease diagnosis effectively learning complex patterns from large datasets, enabling early detection and intervention.

EDUCATION
